SUMMARY

Automation professional with 11 months of experience in workflow optimization and cloud-based tools, along with basic knowledge of Linux, Git, Docker, and AWS. Familiar with system operations, version control, containerization, and cloud fundamentals. Possesses programming knowledge in Python and SQL, and is highly motivated to learn modern deployment, automation, and infrastructure practices while contributing to reliable and efficient system workflows.

TECHNICAL SKILLS

- **Programming Languages:** Python (Pandas, NumPy), SQL
- **Operating System:** Linux(basic), Windows
- **Version Control:** Git, GitHub
- **Cloud and Databases:** MySQL, AWS, Firebase, SharePoint
- **Automation Tools:** Power Automate, Power Apps
- **Data Visualization:** Power BI
- **Web:** HTML, CSS, JavaScript
- **Tools:** Microsoft 365, VS Code, PyCharm
- **Soft Skills :** Problem Solving, Communication, Teamwork, Collaboration, Leadership, Adaptability, Time Management

WORK EXPERIENCE

FZE Digits Solutions

Aug 2024 - July 2025

Power Platform Developer | Low - Code Automation | Microsoft Stack

- Developed Power BI dashboards and automated reporting workflows improving reporting accuracy by 50%.
- Built 3+ Power Apps and automated 10+ workflows using Power Automate, increasing process efficiency by 40%.
- Integrated Microsoft 365 & SharePoint, reducing manual data entry by 60%.
- Created an AI Copilot chatbot, improving query resolution time by 35% and response accuracy by 25%.
- Contributed to 3+ enterprise solutions (including Naghi Project), delivering data insights and automation workflows.
- Led a team of 9 interns in developing an employee management application using Power Apps + Automate.

PROJECTS DURING INTERNSHIP

Process Automation and Workflow Optimization for Mohamed Yousuf Naghi Motors

- Orchestrated 10+ workflow processes using Power Automate, reducing manual effort by 65%, improving data accuracy by 30%, and halving reconciliation time for Naghi Motors.
- Technology Used - Power Automate, MySQL, Office 365.

Attendance Leave Management System

- Designed and deployed a real-time Canvas app with self-triggered leave approvals using SharePoint and Power Automate, reducing HR processing time by 50%.
- Technology Used - Power Apps (Canvas), Power Automate, SharePoint, Office 365.

Enterprise Application Development – Unified Real Estate Development

- Integrated SharePoint + client databases to automate workflows and streamline data processing.
- Enhanced reporting by connecting the app with Power BI and automation scripts.
- Technology Used - Power Apps (Canvas), Power Automate, SharePoint, Office 365, Power BI, Copilot Studio.

Online Sales Insights Dashboard — Power BI / Excel

- Built an interactive sales dashboard with drill-down analysis using advanced filters and slicers.
- Performed data modeling through table joins, connections, and calculated fields.
- Designed customized visuals (bar, pie, donut, line, area, scatter, maps) to deliver clear and actionable business insights.

ACADEMIC PROJECTS

Knightmare Tour(C++, OOP, Backtracking)

- Developed an intelligent Knight's Tour Pathfinder using OOP and recursive backtracking for complete 8x8 board traversal.
- Enhanced efficiency with Warnsdorff's Rule and 2D matrix tracking, enabling dynamic console-based visualization.
- Optimized runtime by 25% through a move-priority heuristic, reducing backtracking and accelerating solution generation.

Household Service Provider App(Web + DBMS)

- Developed secure payment processing supporting 1000+ transactions with 99.9% success rate.
- Integrated Firebase + MySQL for real-time booking and service tracking.
- Designed a smooth backend workflow with strong uptime and optimized data retrieval.

EDUCATION

B.Tech in Computer Science

2021 - 25

Dr.D.Y.Patil Agriculture and Technical University, Talsande

- CGPA: 8.5
- *Academic Achievements:* Distinction in all semesters (2021–2025).
